NOTE: This document is an evaluation of this institution's record of meeting the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with safe and sound operation of the institution. This evaluation is not, and should not be construed as, an assessment of the financial condition of this institution. The rating assigned to this institution does not represent an analysis, conclusion, or opinion of the federal financial supervisory agency concerning the safety and soundness of this financial institution.

Overall CRA Rating

Institution's CRA Rating: This institution is rated **Satisfactory**.

The Lending Test is rated: Satisfactory.

The major factors that support this rating include:

- The Lending Test rating is based on the Satisfactory performance in the state of Illinois.
- A majority of loans are originated and purchased inside the assessment area (AA).
- The loan-to-deposit (LTD) ratio is reasonable.

Loan-to-Deposit Ratio

Considering the bank's size, financial condition, and credit needs of the AA, the bank's LTD ratio is reasonable.

The quarterly average LTD ratio was 43.1 percent for the 15-quarter period from June 30, 2020, through December 31, 2023, with a low of 37.5 percent and a high of 50.7 percent.

The bank ranked third out of seven similarly situated Federal Deposit Insurance Corporation (FDIC) insured institutions that compete with the bank for deposits in the AA. The comparable institutions range in total asset size from \$16.5 million to \$95.8 million and reported quarterly average LTD ratios from 34.9 percent to 87.2 percent.

Lending in Assessment Area

A majority of the bank's loans are inside its AA.

The bank originated and purchased 85.0 percent of its total loans inside the bank's AA during the evaluation period. This analysis is performed at the bank, rather than the AA, level.

| Lending Inside and Outside of the Assessment Area | | | | | | | | | | |

Description of Institution

Mason City National Bank (MCNB) is an intrastate financial institution headquartered in Mason City, Illinois with total assets of \$82.2 million at December 31, 2023. MCNB is wholly owned by Mason City Bancorp, Inc., a one-bank holding company. The bank has two subsidiaries. One is involved in

providing insurance services and the other is involved in providing investment services. Neither the holding company nor subsidiaries impede the bank's ability to meet the credit needs of its community.

MCNB has one rating area. The state of Illinois rating area consists of one legal AA comprised of portions of two non-metropolitan statistical area (Non-MSA) counties located in central Illinois.

MCNB has one location and one automated teller machine (ATM) as of December 31, 2023. The bank provides additional banking access to customers through internet and mobile platforms. There were no branch closures or openings during the review period.

MCNB is primarily an agricultural lender by strategic focus but also offers a full range of deposit and loan products. Agricultural loans represent the largest portfolio at \$22.3 million, followed by residential lending at \$8.6 million, commercial at \$2.0 million, and consumer at \$1.3 million, per call report data as of December 31, 2023. MCNB does not originate loans for sale into the secondary market. Please see the Public File for more information.

The bank reported a net loans and leases to total assets ratio of 41.3 percent and a leverage ratio of 16.0 percent at December 31, 2023.

There are no legal or financial circumstances that impede the bank's ability to meet the credit needs of its AA.

The previous CRA rating, which the Office of the Comptroller of the Currency (OCC) determined using the Small Bank evaluation procedures, was Satisfactory, as detailed in the Performance Evaluation (PE) dated June 15, 2020.

Scope of the Evaluation

Evaluation Period/Products Evaluated

The evaluation covers the period from January 1, 2021, through December 31, 2023. We evaluated the bank under the Small Bank evaluation procedures, which includes a Lending Test.

The Lending Test evaluated loans originated and purchased between January 1, 2021, and December 31, 2023. Farm loans originated and purchased in 2021 were compared to 2021 D&B Data while farm loans originated and purchased in 2022 and 2023 were compared to 2023 D&B Data.

The primary loan product for the evaluation period was determined to be farm loans. The bank originated and purchased 698 loans with farm loans accounting for 29.7 percent by number, and 73.1 percent by dollar volume.

MCNB is not a reporter of small farm data. Performance conclusions are based on a sample of small farm loans, not full population, and are considered in context.

Selection of Areas for Full-Scope Review

In each state where the bank has an office, one or more of the AAs within that state was selected for a full-scope review. For purposes of this evaluation, bank delineated AAs located within the same MSA, multistate metropolitan statistical area (MMSA), or combined statistical area (CSA) are combined and

evaluated as a single AA. Similarly, bank delineated Non-MSA AAs within the same state are combined and evaluated as a single area. These combined AAs may be evaluated as full- or limited-scope. Refer to the “Scope” section under each State Rating for details regarding how full-scope AAs were selected. Refer to appendix A, Scope of Examination, for a list of full- and limited-scope AAs.

Ratings

The bank’s overall rating is based on the state rating for Illinois.

Discriminatory or Other Illegal Credit Practices Review

Pursuant to 12 CFR 25.28(c) or 195.28(c), respectively, in determining a national bank's or federal savings association's (collectively, bank) CRA rating, the OCC considers evidence of discriminatory or other illegal credit practices in any geography by the bank, or in any AA by an affiliate whose loans have been considered as part of the bank's lending performance. As part of this evaluation process, the OCC consults with other federal agencies with responsibility for compliance with the relevant laws and regulations, including the U.S. Department of Justice, the U.S. Department of Housing and Urban Development, and the Bureau of Consumer Financial Protection, as applicable.

The OCC has not identified that this institution has engaged in discriminatory or other illegal credit practices that require consideration in this evaluation.

The OCC will consider any information that this institution engaged in discriminatory or other illegal credit practices, identified by or provided to the OCC before the end of the institution's next performance evaluation in that subsequent evaluation, even if the information concerns activities that occurred during the evaluation period addressed in this performance evaluation.

State Rating

State of Illinois

CRA rating for the state of Illinois: Satisfactory

The Lending Test is rated: Satisfactory

The major factors that support this rating include:

- The bank exhibits a reasonable distribution of loans to farms of different sizes.
- The bank exhibits excellent geographic distribution of loans by income level of the geography.

Description of Institution's Operations in Illinois

MCNB has one legal AA in the state of Illinois, the Non-MSA. The Non-MSA consists of five census tracts (CT) with three CTs from the eastern side of Mason County and two CTs from the western side of Logan County. There were no low-income CTs and one moderate-income CT for the 2021 year. Additionally, two of the three middle-income CTs in the AA were designated as distressed due to population loss. There were no low- or moderate-income CTs in the 2022 and 2023 years and two of two middle-income CTs were designated as distressed due to population loss.

The bank serves its customers through one branch location and one ATM. The branch is open Monday through Friday with additional banking hours on Saturday and provides drive-through services.

Major employment sectors in the Non-MSA include health care, retail trade services, and manufacturing, per the Illinois Department of Commerce. Major employers include Sunrise AG Services Company, Darling International, and Seneca Foods, per the Illinois Department of Commerce.

According to the U.S. Bureau of Labor Statistics, the annual unemployment rate in the state of Illinois was 6.1 percent for 2021 and then declined to 4.6 for 2022, and 4.5 for 2023. The two counties in the Non-MSA compared favorably to the state of Illinois in 2021 and had comparable rates of unemployment for 2022 and 2023.

MCNB sources 100.0 percent of its \$67.6 million in deposits from the Non-MSA in Illinois, per FDIC data as of June 30, 2023.

Competition for deposits and loans is low among financial institutions in the Non-MSA. Competing institutions include national banks, state banks, and farm credit institutions. MCNB held a deposit market share position of 6.3 percent in the Non-MSA counties with \$67.6 million in deposits, per FDIC data as of June 30, 2023. The bank ranked fourth out of 17 FDIC insured financial institutions competing for the area's \$1.1 billion in deposits, as of June 30, 2023.

We obtained two community contact interviews to understand area needs and opportunities in the Non-MSA.

One community contact represented an organization that provides financing and infrastructure opportunities to farmers in Logan County. The contact described the economic condition of the area to

be stable and good for the agricultural industry. The contact described the area’s financing needs as being met. An area of need was described as home loans from local banks. The contact had no negative perception of MCNB.

A second community contact represented an organization supporting economic development in Logan County. The contact described the economic condition of the area to be stable. This contact noted an area of need is small business and micro loans as well as affordable housing and financial literacy. The contact had no negative perception of MCNB.

Scope of Evaluation in Illinois

The bank has one AA in the state of Illinois. The distribution of loans by income level of the borrower received greater weight due to the limited opportunities for lending in the one moderate-income geography in the 2021 year, and absence of any low- or moderate-income geographies in 2022 and 2023 years.

LENDING TEST

The bank's performance under the Lending Test in Illinois is rated Satisfactory.

Conclusions for Area Receiving a Full-Scope Review

Based on a full-scope review, the bank's performance in the Non-MSA is reasonable.

Distribution of Loans by Income Level of the Geography

The bank exhibits excellent geographic distribution of loans in the State.

Small Loans to Farms

Refer to Table S in the state of Illinois section of Appendix D for the facts and data used to evaluate the geographic distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to farms is excellent.

2021:

The distribution of small loans to farms is excellent.

The proportion of lending in moderate-income geographies exceeded both the percent of farms and the aggregate distribution of all reporting lenders.

2022-2023:

There were no low- or moderate-income CTs.

Lending Gap Analysis

We performed a lending gap analysis that included a review of the distribution of sampled small farm loans. We did not identify any unexplained, conspicuous gaps in lending.

Distribution of Loans by Income Level of the Borrower

The bank exhibits a reasonable distribution of loans to farms of different sizes.

Small Loans to Farms

Refer to Table T in the state of Illinois section of Appendix D for the facts and data used to evaluate the borrower distribution of the bank's originations and purchases of small loans to farms.

The distribution of small loans to farms is reasonable.

2021:

The distribution of small loans to farms is reasonable.

The proportion of lending to farms with revenues less than \$1 million was near to the percent of farms and exceeded the aggregate distribution of all reporting lenders.

2022-2023:

The distribution of small loans to farms is reasonable.

The proportion of lending to farms with revenues less than \$1 million was near to the percent of farms and exceeded the aggregate distribution of all reporting lenders.

Responses to Complaints

The bank did not receive any complaints about its performance in helping to meet the credit needs of its AA during the evaluation period.

Appendix A: Scope of Examination

The following table identifies the time period covered in this evaluation, affiliate activities that were reviewed, and loan products considered. The table also reflects the MSAs and Non-MSAs that received comprehensive examination review, designated by the term “full-scope,” and those that received a less comprehensive review, designated by the term “limited-scope”.

Appendix B: Summary of State Ratings

| RATINGS | Mason City National Bank |
|---------------|--------------------------|
| Overall Bank: | Lending Test Rating |
| Overall | Satisfactory |
| State: | |
| Illinois | Satisfactory |

Appendix C: Definitions and Common Abbreviations

The following terms and abbreviations are used in this performance evaluation, including the CRA tables. The definitions are intended to provide the reader with a general understanding of the terms, not a strict legal definition.

Affiliate: Any company that controls, is controlled by, or is under common control with another company. A company is under common control with another company if the same company directly or indirectly controls both companies. For example, a bank subsidiary is controlled by the bank and is, therefore, an affiliate.

Aggregate Lending (Aggt.): The number of loans originated and purchased by all reporting lenders (HMDA or CRA) in specified income categories as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Census Tract (CT): A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tracts nest within counties, and their boundaries normally follow visible features, but may follow legal geography boundaries and other non-visible features in some instances, Census tracts ideally contain about 4,000 people and 1,600 housing units.

Combined Statistical Area (CSA): A geographic entity consisting of two or more adjacent Core Based Statistical Areas with employment interchange measures of at least 15. An employment interchange measure is a measure of ties between two adjacent entities. The employment interchange measure is the sum of the percentage of workers living in the smaller entity who work in the larger entity and the percentage of employment in the smaller entity that is accounted for by workers who reside in the larger entity.

Community Development (CD): Affordable housing (including multifamily rental housing) for low- or moderate-income individuals; community services targeted to low- or moderate-income individuals; activities that promote economic development by financing businesses or farms that meet Small Business Administration Development Company or Small Business Investment Company programs size eligibility standards or have gross annual revenues of \$1 million or less; or activities that revitalize or stabilize low- or moderate-income geographies, distressed or underserved nonmetropolitan middle-income geographies, or designated disaster areas.

Community Reinvestment Act (CRA): The statute that requires the OCC to evaluate a bank's record of meeting the credit needs of its entire community, including LMI areas, consistent with the safe and sound operation of the bank, and to take this record into account when evaluating certain corporate applications filed by the bank.

Consumer Loan(s): A loan(s) to one or more individuals for household, family, or other personal expenditures. A consumer loan does not include a home mortgage, small business, or small farm loan. This definition includes the following categories: motor vehicle loans, credit card loans, other secured consumer loans, and other unsecured consumer loans.

Family: Includes a householder and one or more other persons living in the same household who are related to the householder by birth, marriage, or adoption. The number of family households always equals the number of families; however, a family household may also include non-relatives living with the family. Families are classified by type as either a married-couple family or other family, which is further classified into ‘male householder’ (a family with a male householder and no wife present) or ‘female householder’ (a family with a female householder and no husband present).

Full-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed considering performance context, quantitative factors (e.g., geographic distribution, borrower distribution, and total number and dollar amount of investments), and qualitative factors (e.g., innovativeness, complexity, and responsiveness).

Geography: A census tract delineated by the United States Bureau of the Census in the most recent decennial census.

Home Mortgage Disclosure Act (HMDA): The statute that requires certain mortgage lenders that conduct business or have banking offices in a metropolitan statistical area to file annual summary reports of their mortgage lending activity. The reports include such data as the race, gender, and the income of applicants, the amount of loan requested, the disposition of the application (e.g., approved, denied, and withdrawn), the lien status of the collateral, any requests for preapproval, and loans for manufactured housing.

Home Mortgage Loans: A closed-end mortgage loan or an open-end line of credit as these terms are defined under 12 CFR 1003.2, and that is not an excluded transaction under 12 CFR 1003.3(c)(1) through (c)(10) and (c)(13).

Household: Includes all persons occupying a housing unit. Persons not living in households are classified as living in group quarters. In 100 percent tabulations, the count of households always equals the count of occupied housing units.

Limited-Scope Review: Performance under the Lending, Investment, and Service Tests is analyzed using only quantitative factors (e.g., geographic distribution, borrower distribution, total number and dollar amount of investments, and branch distribution).

Low-Income Individual: Individual income that is less than 50 percent of the area median income.

Low Income Geography: A census tract with a median family income that is less than 50 percent.

Market Share: The number of loans originated and purchased by the institution as a percentage of the aggregate number of loans originated and purchased by all reporting lenders in the state/assessment area.

Median Family Income (MFI): The median income determined by the U.S. Census Bureau every five years and used to determine the income level category of geographies. The median is the point at which half of the families have income above, and half below, a range of incomes. Also, the median income determined by the Federal Financial Institutions Examination Council (FFIEC) annually that is used to determine the income level category of individuals. For any given area, the median is the point at which half of the families have income above, and half below, a range of incomes.

Metropolitan Division: As defined by Office of Management and Budget, a county or group of counties within a Core Based Statistical Area that contains an urbanized population of at least 2.5 million. A Metropolitan Division consists of one or more main/secondary counties that represent an employment center or centers, plus adjacent counties associated with the main/secondary county or counties through commuting ties.

Metropolitan Statistical Area: An area, defined by the Office of Management and Budget, as a core based statistical area associated with at least one urbanized area that has a population of at least 50,000. The Metropolitan Statistical Area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county or counties as measured through commuting.

Middle-Income: Individual income that is at least 80 percent and less than 120 percent of the area median income, or a median family income that is at least 80 percent and less than 120 percent, in the case of a geography

Moderate-Income: Individual income that is at least 50 percent and less than 80 percent of the area median income, or a median family income that is at least 50 percent and less than 80 percent, in the case of a geography.

Multifamily: Refers to a residential structure that contains five or more units.

Owner-Occupied Units: Includes units occupied by the owner or co-owner, even if the unit has not been fully paid for or is mortgaged.

Qualified Investment: A qualified investment is defined as any lawful investment, deposit, membership share, or grant that has as its primary purpose community development.

Rating Area: A rated area is a state or multi-state metropolitan statistical area. For an institution with domestic branches in only one state, the institution's CRA rating would be the state rating. If an institution maintains domestic branches in more than one state, the institution will receive a rating for each state in which those branches are located. If an institution maintains domestic branches in two or more states within a multi-state metropolitan statistical area, the institution will receive a rating for the multi-state metropolitan statistical area.

Small Loan(s) to Business(es): A loan included in 'loans to small businesses' as defined in the Consolidated Report of Condition and Income (Call Report) instructions. These loans have original amounts of \$1 million or less and typically are either secured by nonfarm or nonresidential real estate or are classified as commercial and industrial loans.

Small Loan(s) to Farm(s): A loan included in 'loans to small farms' as defined in the instructions for preparation of the Consolidated Report of Condition and Income (Call Report). These loans have original amounts of \$500,000 or less and are either secured by farmland or are classified as loans to finance agricultural production and other loans to farmers.

Tier 1 Capital: The total of common shareholders' equity, perpetual preferred shareholders' equity with non-cumulative dividends, retained earnings and minority interests in the equity accounts of consolidated subsidiaries.

Upper-Income: Individual income that is at least 120 percent of the area median income, or a median family income that is at least 120 percent, in the case of a geography.

Appendix D: Tables of Performance Data

Content of Standardized Tables

A separate set of tables is provided for each state. All multistate metropolitan statistical areas, if applicable, are presented in one set of tables. References to the “bank” include activities of any affiliates that the bank provided for consideration (refer to appendix A: Scope of the Examination). For purposes of reviewing the Lending Test tables, the following are applicable: (1) purchased are treated as originations; and (2) “aggregate” is the percentage of the aggregate number of reportable loans originated and purchased by all HMDA or CRA-reporting lenders in the MMSA/assessment area. Deposit data are compiled by the FDIC and are available as of June 30th of each year. Tables without data are not included in this PE.

The following is a listing and brief description of the tables included in each set:

Table S. Assessment Area Distribution of Loans to Farms by Income Category of the Geography - The percentage distribution of the number of small loans (less than or equal to \$500,000) to farms originated and purchased by the bank in low-, moderate-, middle-, and upper-income geographies compared to the percentage distribution of farms (regardless of revenue size) throughout those geographies. The table also presents aggregate peer data for the years the data is available. Because aggregate small farm data are not available for geographic areas smaller than counties, it may be necessary to use geographic areas larger than the bank’s assessment area.

Table T. Assessment Area Distribution of Loans to Farms by Gross Annual Revenues - Compares the percentage distribution of the number of small loans (loans less than or equal to \$500 thousand) originated and purchased by the bank to farms with revenues of \$1 million or less to: 1) the percentage distribution of farms with revenues of greater than \$1 million; and, 2) the percentage distribution of farms for which revenues are not available. The table also presents aggregate peer small farm data for the years the data is available.

The total loan amount presented in the tables for each assessment area may differ from the total loan amount reported in the aggregate table due to how the underlying loan data is rounded in each table.
